## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 14-35,38-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is still unclear from the drawings and specification what is meant by the “third state” of the first actuating assembly in the recitation of claim 14, where in the last two lines, the claim recites that the first actuating assembly is changeable into a third state to thereby change the blocking assembly into its first state. This appears to contradict the specification page 32, lines 8-9,12-14 which states that the blocking assembly is independent of the first actuating assembly.

Furthermore, the amendments to page 22 of the specification and the corresponding new recitation in claims 34,35 (and its dependent claims 38,39) are not understood. Specifically, how exactly is the first actuating assembly operably connected to the other components without being secured together, merely by translational movement “along the line L”, as discussed on page 22 and claims 34,35?

***Allowable Subject Matter***

3. Claims 1-11,13,40-42 are allowed.

***Response to Arguments***

4. Applicant's arguments filed 5/15/06 have been fully considered but they are not persuasive. While Applicant's arguments with respect to the prior art are persuasive, ultimately the application is not in condition for allowance since issues remain under 35 USC 112, 1<sup>st</sup> paragraph as set forth above. Applicant's amendments to the specification and claims 34,35 present new issues under 35 USC 112 as discussed. Furthermore, contrary to Applicant's arguments, the "third state" of claim 14 is not clearly understood as further expounded above. It is not merely the disclosure of a third state (it is agreed that this is recited on pages 31-32), but rather the substantive and contradictory disclosure with respect to the blocking assembly, which renders claim 14 unclear and not understood. Accordingly, claims 14-35,38,39 stand rejected.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
